Hi, Heather.

See attached for some applicable emails that may help understand the situation better. If you want to discuss, I'd be glad to.

-Lindsay

Lindsay: do you have any meeting minute notes from 2016 where Taminco came in as a pre submission meeting to discuss the current first food use action that is in house with the 10 day deficiency letter? Jessica called me and said they already discussed this submission with us in 2016 and EFED stated they didn't need some of these studies. They also mentioned that they got a 10 day letter converted to a 75 day letter for the import tolerance action for chlormequat chloride that you and Tony worked on. Do you know what they are referring to?

Thanks!  
Heather
